

To Whom It May Concern;

I wish to express my opinion concerning the NAB petition #04-160 now before you. As a customer of XM Satellite radio, I find their weather and traffic channels extremely helpful. This applies not only here in Houston, but also when I travel to other cities on business. They are instantly available and detailed to a degree not available on over-the-air stations. Since XM is a pay service, it seems to me that the content they provide is an issue between XM and it's paying customers. I urge you to reject this petition and let the broadcasters address their market share concerns by improving their product rather than by seeking to limit the superior service of others.

Thank you for your attention,

Jay Booth
